"Use of a Non-invasive Test (Entero-test) in the Detection of Helicobacter pylori in Children in an Endemic Area in Colombia"

Learning Objectives:

1. Describe different non-invasive diagnostic tools for the detection of *H. pylori*
2. Understand the association of gastric cancer with chronic *H. pylori* infection
3. Recognize the importance of virulence-associated genes in the pathogenesis of *H. Pylori*

"Diet and Functional Abdominal Pain in Children and Adolescents: A Review of the Literature"

Learning Objectives:

1. To understand the role of diet in FAP.
2. Be able to distinguish mechanisms by which food can affect symptoms in FAP
3. Know the dietary strategies for patients with FAP

Principal Faculty and Credentials

Faculty credentials and disclosures are listed in the Journal articles

Date of Release:

August 1, 2013

Date of Last Revision:

August 1, 2013

Date of Expiration:

August 1, 2015

Necessary Hardware and Software:

Adobe

Compatible Web Browser listed below:

- Internet Explorer version 6.0 or higher
- Mozilla Firefox 1.0 or higher
- Netscape Navigator 6.0 or higher
- Apple – Safari

Estimated Time to Complete this Activity:

It is estimated that it will take 1 hour to read the article and complete the post test.

Method of Physician Participation:

All participants read an article, take a post-test with a minimum of 100% passing score and complete an activity evaluation at the end of the activity before being able to print a certificate of completion.

Policy on Privacy and Confidentiality:

The personal information collected on this evaluation site is used only for our records and is not distributed to any individuals or companies.
