"Safety, Tolerability, and Clinical Response after Fecal Transplantation in Children and Young Adults with Ulcerative Colitis"

Learning objectives:

- a) To know the adverse events associated with FMT
- b) To understand components of donor screening for fecal microbiota transplantation (FMT)
- c) To understand that use of FMT in IBD is still in its preliminary stages

"Characterization of Esophageal Motility following Esophageal Atresia Repair using High-Resolution Esophageal Manometry"

Learning objectives:

- a) To describe the multifactorial origins of esophageal dysmotility in esophageal atresia (EA) operated patients
- b) To know which conditions can contribute to the development of esophageal symptoms in EA operated patients;
- c) Learn the main findings in High-Resolution Esophageal Manometry (HREM) evaluation of EA operated patients;
- d) List the symptomatology of EA patients.

Principal Faculty and Credentials

Faculty credentials and disclosures are listed in the Journal articles

Date of Release:

June 1, 2013

Date of Last Revision:

June 1, 2013

Date of Expiration:

June 1, 2015

Necessary Hardware and Software:

Adobe

Compatible Web Browser listed below:

- Internet Explorer version 6.0 or higher
- Mozilla Firefox 1.0 or higher
- Netscape Navigator 6.0 or higher
- Apple – Safari

Estimated Time to Complete this Activity:

It is estimated that it will take 1 hour to read the article and complete the post test.

Method of Physician Participation:

All participants read an article, take a post-test with a minimum of 100% passing score and complete an activity evaluation at the end of the activity before being able to print a certificate of completion.

Policy on Privacy and Confidentiality:

The personal information collected on this evaluation site is used only for our records and is not distributed to any individuals or companies.

Bibliographic Sources
